

Efficient Software, Exceptional Service...

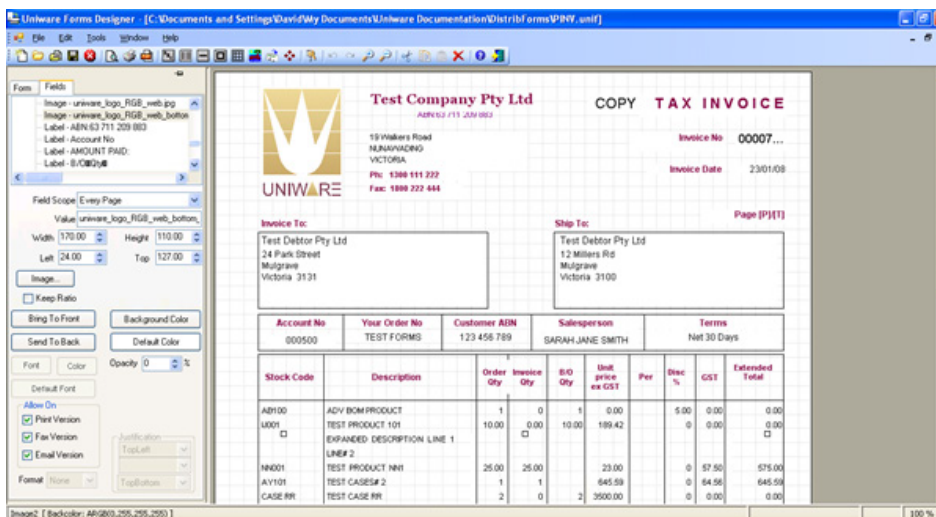

UNIWARE FORM SERVICES - AT A GLANCE

Eliminate the high costs of pre-printed stationary and archive your Distrib and AusVantage reports by using our flexible and versatile Forms Management service. Design your own forms in multiple colours, fonts, styles- in addition to inserting barcodes, images and watermarks. You can choose to print, fax or e-mail your AusVantage or Distrib documents in PDF format from your desktop. The reports are saved in PDF straight to the directory of your choice on your server.

The Uniware Forms Processing application consists of the following parts:

UNIWARE FORMS DESIGNER

This program allows for the creation and modification of a forms template. The forms template consists of static details such as labels, images, lines, rectangles and background images. Mapped data fields, such as the Purchase Order number or the Supplier Name on a Purchase Order, are added to the forms template when the form is produced. The Forms Designer allows for the mapping of these data fields to positions on the forms template.

Uniware is a complete IT solution provider offering the following:

- AusVantage ERP
- IT infrastructure
- E-Business
- Web Services
- Cloud Services
- Internet Services

Uniware members include Xceed, OzISP and Just-IT:

Xceed - Our Web development studio offering more than Web design. Services include Web Application development, Content Management Systems, Search Engine Optimisation, E-commerce and E-marketing.

OzISP - our Internet Service provider offering fast & reliable Internet Access, accessible from anywhere in Australia, with simple no-fuss internet plans and site hosting designed to suit your needs.

Just-IT - specialises in providing IT solutions and services for Small to Medium enterprises. From servers and desktops to VoIP telephony, networking or backup, Just-IT has a product or solution to fit.

Efficient Software, Exceptional Service...

UNIWARE FORMS SERVICE

This program runs as a service and monitors a user defined queue for forms data.

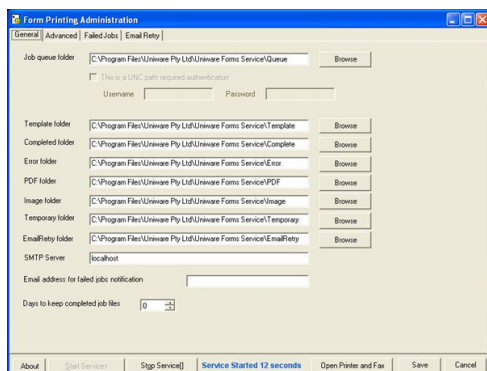

This forms data record will contain the following details:

- The required Forms Template name.
- The processing method, which can be either Print, Fax or Email.
- Page Header details such as Invoice and Purchase Order Numbers.
- Detail lines such as product codes, quantities and costs.

Once a forms data record is found the data is added to the forms template. The resulting documents are then printed, faxed or emailed according to the specification in the text file.

UNIWARE FORMS ADMINISTRATION

This allows for the initial registration of the Uniware Forms Service, defining of path names and the smtp server details.
