

Capability Statement - Legacy Support & Development

ABOUT US

Uniware Pty Ltd professional services division offers legacy application support and development services to MultiValue application users. We have offices and staff located in Melbourne, Sydney, Perth and Wuhan (China). The Uniware group includes Xceed Web Development Pty Ltd and OzISP Pty Ltd

Since the late 1980's we have been a distributor or reseller of D3 (Pick), Unidata, Universe and other MultiValue (MV) database management systems (DBMS), offering support and development services for legacy application systems.

Many customers have decades of intellectual development, processes and data invested in their legacy applications and whilst looking to embrace contemporary technology do not wish to discard this significant investment.

Uniware provides products and services designed to provide customers with continuity of service and enhancement to these often complex applications whilst moving them forward with modern technologies where appropriate.

UNIWARE SERVICES

Widely known for our Distrib ERP application software developed during the 1980's and more recently our AusVantage ERP system developed for MultiValue DBMS, we continue to develop new applications and solutions using contemporary technologies. TESTIMONIAL

"The transition for our users from the in-house facility to Uniware's Data Centre was seamless with no issues or downtime in the transition. The knowledge that our hardware and mission critical applications are now being fully managed in a state of the art facility provides a higher level of confidence and a peace of mind".

Gary Beville
Chief Operations Officer
